BLANCO ARE THE EXPERTS.

Drink. Prep. Clean. Everything you need, all in one place. Sink, tap, integrated organisation and waste management, seamlessly combined in the BLANCO UNIT for a stunning, creative kitchen hub at the heart of your home.

Discover more at blanco.co.uk

GERMANY SINCE 1925

As a German company, founded nearly a century ago, we are among the world's leading manufacturers of kitchen taps, sinks, and integrated waste and organisation systems.

We are passionate about the heart of your kitchen, the sink-space is the hub, where tasks need to run smoothly and efficiently. It's the most important place in the kitchen, and our many years of experience in cutting-edge technology can make it even better.

Welcome to The BLANCO UNIT Inspirations Collection. Did you know that we spend more than half of our time in the kitchen using the sink, tap and waste area? Which is why BLANCO focuses on improving how you can use this space. Adding intelligent features, introducing new designs and innovative materials to make kitchen life easier, everyday.

With the BLANCO UNIT it all flows naturally. Sinks, taps and waste management systems are the most commonly used items in the kitchen. However, they are rarely given the consideration during planning that they deserve.

We're looking to change that with the BLANCO UNIT: seamless solution for a creative yet practical kitchen hub at the heart of your home.

The BLANCO UNIT combines our premium products together, letting you choose the right items to suit your kitchen style and lifestyle. There are different elements you need to consider when putting together your ideal kitchen hub. On the following pages we're providing some curated inspiration to help choose your perfect BLANCO UNIT.

WHAT IS THE BLANCO UNIT?

Everything you need for your kitchen life and lifestyle, all in one place.

Tap: drink.hot EVOL-S Pro in black matt
Sink: ETAGON 500-U in stainless steel
Waste System: SELECT II Compact 60/2

Where we spend our time in the kitchen in the UK

DRINK. PREP. CLEAN.

With the BLANCO UNIT you can create the perfect place to drink, prep and clean, that fits your style and your lifestyle. Day-to-day drink making, food preparation and cleaning now take place at a sophisticated sink area, combining all three tasks to perfection. Vegetables are peeled, washed and off-cuts disposed of in just a few simple movements. Tea made simple with a boiling water tap, cool drinks created with pure filtered water and life made easier with features including flexible or pull-out sprays.

The space under the sink, that no-go-area of chaotic (but important) storage becomes perfectly tailored with an integrated waste, in-cabinet organisation or food waste disposer.

All of this with millimetre precision, premium quality and ingenious ideas to make kitchen life easier everyday.

And within this special BLANCO Inspirations Collection we will be showcasing how the BLANCO UNIT can fit seamlessly and stylishly within any kitchen design you choose.

A PERFECT COMBINATION.

We spend about 60% of our time in the kitchen at the sink. It's where we fill our glasses, prepare food, rinse dishes, get rid of food waste, store cleaning products and separate the recycling. So it's important to ensure that things happen quickly and efficiently here. Having everything you need within easy reach and working together smoothly is key.

With the BLANCO UNIT daily cooking, food preparation and cleaning become simply easy, saving you space, energy and time, making those essential daily tasks an absolute breeze.

Sink: ETAGON 6 in SILGRANIT rock grey

Tap: SONEA-S Flexo in solid brushed stainless steel.
Sink: ADIRA 6 S in volcano grey.

Tap: LINUS-S Sink: SUBLINE 500-U both in SILGRANIT volcano grey

THINGS TO CONSIDER WHEN CHOOSING YOUR BLANCO UNIT.

It is essential to be aware of the cabinet width in which your sink will be installed. The bowl, (or bowls in the case of a multi-bowl sink), will need to fit into this space. Each sink in this brochure will show a minimum cabinet required to house it successfully.

STEP ONE: SELECT YOUR TAP.

Are you looking for instant true – 100°C water, the highest quality cold filtered water, or perhaps you want both? Do you need a pull-out spray, or want a semi-professional style tap?

We have a huge selection of top-quality mixer taps, with award-winning designs – find the ideal tap for your kitchen. But, before choosing your BLANCO tap it is essential to check whether you have a high or low pressure water system. More information about this is on page 63.

INSTALLATION FORMATS.

Inset sinks

Inset sinks are installed from above into a pre-prepared hole in the worktop. These sinks are compatible with any work surface, including laminate. It gives you the widest range of sink shapes, sizes and styles to choose from. The frame of an inset sink sits on top of the work surface.

Undermount bowls

Undermount sinks are installed underneath the work surface and therefore require a solid surface worktop such as granite or wood; they are not compatible with laminate work surfaces.

Belfast / apron front bowls

Belfast sinks can be fitted undermount, as pictured above or inset with a slight raised edge profile. Belfast sinks are either 'dropped-on' to a purpose-built cabinet or by using installation brackets.

STEP TWO: CHOOSE YOUR SINK OR BOWL.

BLANCO sinks and bowls are available in an array of different sizes, with a range of installation methods, colours and multi-functional solutions for every standard base cabinet. Whether you are creating a contemporary space and want the latest in undermount designs or stunning inset sinks with drainers, or if you want a farmhouse style bowl for a more traditional look – we have them all.

Three high-quality materials also offer you the option of designing the BLANCO UNIT your way: Beautiful Silgranit® composite, timeless stainless steel or luxurious ceramic. The choice is yours.

STEP THREE: WASTE LESS SPACE.

Reclaim that no-mans-land area under your sink with BLANCO waste organisation systems and food waste disposers. Whether you are looking to organise your cleaning products, store pet items or sort your recycling, we have a system for you. The BLANCO range of organisation and waste management systems give you options for most standard sized, hinged door or pull-out drawer cabinets.

Food waste disposers (FWD) are very convenient when it comes to disposing of leftovers quickly, hygienically and easily. They cut down the amount of waste in the organic waste bin and lower the amount of material sent to landfill sites.

BLANCO UNIT INSPIRATIONS.

We have curated a range of BLANCO UNITS to reflect on our latest innovations and kitchen designs so you can create the perfect BLANCO UNIT to match your space and needs. Additionally you can create your own ideal BLANCO UNIT from browsing our range of products at blanco.co.uk.

Inspiration#1.

Modern kitchen designs blend functionality with being aesthetically pleasing and includes innovative features coupled with clever storage solutions.

Create endless possibilities in the kitchen with new CHOICE Icona and CHOICE.All, the tap and drink.system that together provide a simple solution for all types of water. Just one simple installation lets you enjoy water your way with personalised pre-sets – the level of sparkle, the temperature, filtered or unfiltered, all tailored to individual taste buds. The compact system fits discreetly under the sink and can pair with storage or waste organisation solutions too.

Add warmth to a modern grey kitchen theme, with striking metal accents for a touch of richness. The CHOICE Icona in satin dark steel, coupled with matching InFino® Coloured Component set, creates a distinctive, coordinated, and contemporary aesthetic. Combine these satin dark steel elements with the ETAGON 500-U in Silgranit® volcano grey to create a tonal look with a harmonious colour palette. Then finish with the SELECT II 40/2 Combi waste and organisation system, which sits neatly next to the CHOICE.All water conditioning unit. It provides particularly good access to it for changing the filter or CO₂ cartridges and has a shelf above it for storage for new cartridges. This innovative BLANCO UNIT is distinctive and has style and substance in abundance.

Inspiration#2.

Having a kitchen space that looks as good as it functions is a priority for most people. High tech, high spec kitchens with elevated finishes are becoming more and more popular as we expect our kitchen to keep up with our busy lives.

Enjoy water your way with cold, hot, chilled, boiling, filtered and sparkling water – all in one place. The combination of semi-professional tap CHOICE Icona and water conditioning unit CHOICE.All provides one solution for all types of water choices. Pair with the ETAGON 500-U in Silgranit® volcano grey, to harmonise with the brushed stainless steel CHOICE Icona tap. The compact CHOICE.All system fits discreetly under the sink and can couple with the SELECT II 40/2 Combi and Orga shelf for clever storage or waste origination, rounding off this innovative and multi-functional BLANCO UNIT.

Inspiration#3.

An exclusive look, stylish and warm, dark steel has a fine texture and a velvety feel. Truly versatile, its harmonious tone matches easily with a large palette of colours and materials. It can be used as a unique feature aesthetic to make a bold statement in any space.

The CLARON 700-U Dark Steel Edition is an elegant and striking bowl design with a dark grey surface. Here stainless steel shows its trendy side and impresses with its unique colour as well as functionality. The BLANCO CULINA-S II is an exquisitely designed semi-professional tap, available in accompanying satin dark steel to create a striking, harmonious combination. Pair with the FWD Max for a hard-working and aesthetically pleasing BLANCO UNIT.

Inspiration#4.

Today's modern kitchen seamlessly combines function, aesthetic and innovation where every square inch needs to work hard. That is no truer when considering the kitchen water place, it should be contemporary in style and suitably ergonomic.

The SONEA-S Flexo is a precision crafted designer semi-professional mixer tap with accents of black for the modern kitchen. And the spacious ADIRA 6 S impresses with its functional features including the multifunctional ADIRA folding grid which can be used as an additional work level on the sink or draining board. These two together will definitely make a contemporary statement in your kitchen. Finishing off with the SELECT II 60/2, you have a multipurpose BLANCO UNIT with style and substance.

Inspiration#5.

Intense, modern, luxurious... black is indisputably elegant. Often used within interior design to visually ground a room with its depth of tone, it can be used as the main aesthetic or to make a bold feature in any space. Layer black on black, or bring warmth and contrast to a mainly black kitchen, by introducing a feature accent like a tap in stylish metallics.

The drink.hot EVOL-S Pro is a gamechanger for the modern kitchen, providing the exact amount of boiling hot or filtered water you need at the touch of a button. It is available in three different finishes to suit your ideal kitchen aesthetic. Paired with the ETAGON 500-U in Silgranit® black and a SELECT II Compact 60/2 waste organisation system, this combination of tap, sink and waste system delivers a practical and multi-functional, yet stylish BLANCO UNIT.

Inspiration#6.

White in a kitchen reflects light, making the space feel larger and look pristine. White, with its versatility and simplicity is the perfect backdrop to add a few harmonised features in an accent colour, like gold, for added interest or to elevate the overall design.

The LINUS-S in satin gold is sophisticated and opulent. It has a minimalist design with a high quality metal spray. When paired with a SUBLINE 800-U sink, in Silgranit® soft white, with InFino® satin gold set, you have a harmonious and luxurious co-ordinated combination. And when combined with a BOTTON II 30/2 waste organiser you have a BLANCO UNIT that makes a statement of sophistication.

Inspiration#7.

Having a considered approach to your kitchen's colour scheme matters, and nowhere is more important than the water place. Colours and finishes can help you create the perfect style, whether you want it to be light and bright or rustic and organic, or maybe you want a clean, contemporary look.

Create a visually pleasing BLANCO UNIT by combining contrasting colours for your tap, sink and drainage components to make a statement or go for a more uniform tonal look. Whatever your preference, create a coordinated colour palette for your kitchen to get a really individual look. Choose coloured drainage components in a range of finishes, to match your tap in the same look. Here the SUBLINE 500-U in Silgranit® tartufo, has an elegant design and when paired with the LINUS-S in satin platinum with matching Coloured Components, you have a very harmonious BLANCO UNIT. Or go for a more rich, dark colour palette, with the matt black LINUS-S and matching Coloured Components coupled with a striking Silgranit volcano grey SUBLINE 500-U sink.

Inspiration#8.

Including white in kitchen design is still a very popular choice because it adds an element of bright, airiness and doesn't require a lot of stressful colour decisions. BLANCO's Silgranit® white shade is incredibly easy to live with and so versatile, it can be combined with a dark hue worktops for a distinctive, contrasting look or paired with warmer hues for a more neutral look.

The CATRIS-S semi-professional tap in chrome has a striking, distinguished design, with the flexible spout and stainless steel spring, making a stylish statement at the water place. When paired with a SUBLINE 700-U sink in Silgranit white you have a hard-working but attractive union. Especially when combined with the FWD Medium, providing the most hygienic way to dispose of food waste, you can finish off your BLANCO UNIT with added functionality.

Inspiration#9.

Do you love the purity and elegance of a white kitchen but want to add some warmth and variety? Visually break up the different sections of the kitchen with a mix of textures and finishes, adding accents of neutral colours like black, grey and silver. This way you'll maintain the simplicity of a white colour scheme but with a bit of diversity.

The SONEA-S is a classic semi-professional tap design with accents in black for the modern kitchen. It's a high quality design in solid brushed stainless steel. The METRA XL 6 S in white is a practical and spacious sink. Add a FWD Medium and there you have a flexible and multi-functional BLANCO UNIT that certainly makes kitchen life easier.

Inspiration#10.

Grey is a very versatile colour in kitchen design. Whether you just add touches of it, or use it as the dominant colour, grey tones can conform and complement or help transform pretty much any kitchen theme.

The CANDOR Twin has a high-quality design in solid stainless steel and an elegant high arch. It pairs well with the METRA 6 S Silgranit® in versatile rock grey, which is a practical and spacious sink. And with the FWD Medium and the BOTTON Pro 60/3 waste system you have an extremely practical but stylish BLANCO UNIT to suit busy kitchen life.

Inspiration#11.

Stainless steel is a classic choice that always looks stylish and elegant. It is also a very practical material, which is why it is so popular. Stainless steel is easy to clean and maintain, which makes it a great material for kitchen appliances and accessories, plus it complements any kitchen design scheme.

The robust ANDANO 500-U in classic stainless steel has an elegant design and high quality features. Combine it with the CATRIS-S Flexo Filter in PVD steel, for a timeless pairing. It's a sophisticated semi-professional tap which dispenses filtered water directly out of the tap whilst still maintaining a refined design. Clever optional accessories like the stainless steel Top Rails and Multifunctional Colander in stainless steel help to really make the most of the space around the sink. Add the BOTTON II 30/2 and you have a practical and very hygienic BLANCO UNIT.

Inspiration#12.

It can be hard to get the perfect balance in your kitchen between light and dark tones, thereby creating some visual contrast. Light shades are a winning colour choice for kitchens, as they offer a contemporary and clean look. And by adding striking dark features throughout, this makes a really stylish contrast that feels very modern.

The MAX II in matt black is a practical and elegant tap. Couple it with the SONA 6 S in Silgranit® black – a solid, hardy sink with a roomy main bowl and practical additional bowl. Include optional accessories like the Multifunctional Wire Basket for added functionality around the sink. Add on the FWD Medium and the BOTTON II 30/2 and you have a very solid, functional BLANCO UNIT.

SPECIFICATION AND INSPIRATION OPTIONS.

If you liked the look of some of our inspirations on the previous pages but still can't decide which best suits your style or kitchen specification you can view alternative sink sizes, colour options and waste and organisation choices on these pages.

ACCESSORIES TO MAKE KITCHEN TASKS EASIER.

Choose from the BLANCO range of ingenious accessories to transform your sink into a multi-functional workplace in just a few simple steps. In order to make best use of the space over the sink, you can often use other sink accessories such as multi-functional colanders or a foldable grid. Even in small kitchens, these can provide additional working surfaces to carry out many tasks.

CHOPPING BOARDS.

A wide variety of quality chopping boards are available – in a variety of woods, glass or high-quality plastic. These are specially made to be used over the sink or by the side, to allow for a flexible chopping space.

WORKTOP ORGANISATION.

To help keep it tidy on the worktop, these organisation aids can be flexibly placed on the worktop or straddled across the sides of BLANCO bowls. They provide easy access to key items around the sink, like soap dispensers or cleaning products and reduce clutter on your work top.

COLANDERS.

A variety of stainless steel colanders allow for rinsing and draining pasta or vegetables right in the sink, making this kitchen task so much simpler.

FOLDABLE GRID.

Transform your sink into a modern kitchen workspace with our foldable grids. These can be placed on the drainer, over the bowl or on the worktop, to use for draining washed items or filling up pots. It's easy to stow away and vary the positioning on the drainer, thanks to the practical folding function.

BLANCO FOOD WASTE DISPOSERS.

A smart addition to your BLANCO UNIT. The most environmentally-friendly, time efficient and hygienic way to grind down and flush away food waste.

BETTER KITCHEN HYGIENE.

Avoids the mess of traditional bins that often create unpleasant odours and bacteria growth.

SMARTER USE OF TIME.

A quick and easy way to dispose of food during meal preparation, food waste just goes straight down the sink. Meaning less time is spent cleaning out your food waste bins.

SAFE AND SIMPLE TO USE.

No knives or blades are used. All moving parts are blunt. Controlled by the touch of a button, with only cold running water needed to assist. Because the device is rinsed during the grinding process, it requires little additional care.

LIMIT YOUR LANDFILL.

Ground-up food is flushed away into your regular system and treated at the water plant, usually by converting it into soil conditioner that can be turned into clean energy. The FWD is installed directly beneath the sink and grinds food waste so finely it flows through your sewage pipe easily.

HOW YOUR FWD GENERATES GREEN POWER.*

THE BLANCO FWD RANGE IN MAX, MEDIUM AND LITE FITS MOST BLANCO SINKS AND BOWLS.

SILGRANIT® COLOUR OPTIONS.

Silgranit's beautiful, smooth and tactile surface is available in a range of design-oriented colours. Colour is such an important part of our lives, especially in our homes. It's a fundamental aspect of interior design and we use it as an expression of our own style. The palette of Silgranit sink colours runs from monochrome black and white, through to on-trend greyscale shades, into warm earth tones.

TAPS AND SINKS EXPLAINED.

A key to important features and considerations.

We have highlighted on page 6 the importance of knowing your sink cabinet size and what type of sink installation format you are looking for, whether it is inset, undermount or Belfast (apron front bowl). Here is some additional information you'll need to think about when choosing your sink and tap.

TAPS.

Water pressure

BLANCO has a range of taps suitable for low and high pressure systems. BLANCO considers taps 0.3 bar and below as low pressure.

Features

- Pull-Out Spray:** Features a pull-out spray, useful for directional rinsing.
- Extendable Spray:** Features a pull-out spray hose for extended work area.
- Solid Spout:** Tap spout does not extend.
- Senso Version:** Includes hands-free Start-Stop mode with sensor technology.

SINK PROFILES.

BLANCO sinks come with a range of different profiles.

Inset installation / installation from above: The frame of an inset sink sits on top of the work surface and is installed from above. These sinks are compatible with any work surface, including laminate worktops.

IF and IF/A: Unique 1mm flat edge profile for inset flush installation.

Undermount: Installed underneath the work surface.

BOWL CONFIGURATION.

Select the correct sink configuration for your kitchen.

UNI (Universal) indicates an inset sink suitable for both left and right configurations.

TAP FLOW RATES EXPLAINED.

Before choosing your BLANCO tap it is essential to check whether you have a high or low pressure water system.

Low pressure (Gravity-fed system)

You have a cold water tank in your attic and a hot water tank in your airing cupboard. You should choose taps which state they are suitable for a low pressure system.

High pressure (Combi-boiler system)

You have a boiler unit but no hot water cylinder, the boiler unit is usually found in the kitchen and delivers hot water on demand. You should be able to choose from most of our taps.

High pressure (Pumped system)

You have a hot water cylinder with an expansion vessel on top (often called Megaflo), usually found in the airing cupboard, but you do not have a cold water tank. You should be able to choose any of our taps.

BLANCO UK Limited: The Inspirations Collection only represents a small selection from our UK range. If you require details about our complete range of sinks, taps, waste organisers, waste disposal units and accessories, please contact your local BLANCO dealer, or visit www.blanco.co.uk
